

NORMAN KIPNGETICH BII

Software Developer

Mobile no: +254 71400481 | Email: biinorman1@gmail.com | GitHub: <https://github.com/repoleved08> | LinkedIn: <https://www.linkedin.com/in/norman-bii-87382722a> | Experience: 3+ Years

ABOUT ME

I am an IT professional specializing in C#, .NET full stack development, with expertise in ASP.NET, Blazor WebAssembly, and JavaScript. I have developed web solutions using Python Django and Vue, integrating technology with user experience. Additionally, I have a solid background in networking, demonstrated through my participation in the National Huawei Competition. My experience also includes media monitoring and analysis at the Media Council of Kenya, where I ensured broadcast content compliance with journalistic standards.

SKILLS

Industry Expertise:

- Programming languages: C#, Python, JavaScript
- Web frameworks: Vue, Python-Django, ASP.NET Core
- Design tools: Figma, Canva
- Data structures and algorithms
- AWS hosting
- Azure Devops
- Github collaboration

Soft Skills: Strong Interpersonal Skills | Problem-Solving | Excellent Communication Skills | Leadership | Attention to Detail | Critical Thinker | Effective Time Manager | Team Player | Collaborator | Analytical Skills

ACHIEVEMENTS

- C# .NET Full Stack Development Certification from TheJitu
- Cybersecurity Competition, Hack The Box
- Advanced to the national level in a Networking Competition organized by HCI Huawei

WORK EXPERIENCE

Intern

Media Council of Kenya

March 13th 2024 – June 18th 2024

- Conducted media monitoring and analysis of content broadcasted by radio and TV stations across Kenya.
- Fact-checked various media formats using OSINT tools, such as search by image and exif2.
- Analyzed TV and radio content to ensure alignment with the code of conduct for journalists.
- Wrote weekly report on the entire monitoring and analysis including on instances where journalists and media practitioners violated the code of conduct.

- Contributed ideas to simplify media monitoring and analysis processes.

C# Full-stack Developer

TheJitu

July 2023 – Oct 2023

- Developed a microservice project using ASP.NET Web API.
- Implemented features for hospital management, demonstrating proficiency in backend development.
- Built an e-commerce platform using ASP.NET Core and Blazor WebAssembly.
- Collaborated effectively on GitHub, demonstrating proficiency in version control with Git.
- Utilized Azure DevOps for project management, organizing work using tickets.
- Implemented Continuous Integration and Continuous Deployment (CI/CD) pipelines on Azure for automated deployment.
- Connected application services with Azure Message Bus, showcasing expertise in cloud-based services.

EDUCATION BACKGROUND

- Karatina University
Bachelor of Sciences Information Technology,

August 2019 – May 2023

SHORT COURSES

- C# Full-Stack Web Development
- Huawei HCIA Network truck

May 31 2023 – August 24th 2023

March 2022 – May 2022
