

NORMAN KIPNGETICH BII

Software Developer

Mobile no: +254 714000481 | Email: biinorman1@gmail.com | GitHub: <https://github.com/repoleved08> |

LinkedIn: <https://www.linkedin.com/in/norman-bii-87382722a> | Experience: 3+ Years

PROFILE

I am a recent IT graduate and software developer with over 3 years of practical experience in developing web applications and digital solutions. I have experience in both backend and frontend development and my primary interest is within Laravel, Vue.js, and Livewire. I have experience creating RESTful web services with Golang and have experience developing interactive, elegant UIs with React for applications that emphasize secure coding. I believe in using modern frameworks and creating user-friendly applications.

SKILLS

Tech & Tools:

- Programming: C#, Laravel, JavaScript, Golang
- Web: ASP.NET Core, Blazor WebAssembly, React, Vue, HTML, CSS
- CMS: WordPress, RichEditor (WYSIWYG)
- Cloud & Admin: Microsoft 365, Google Workspace, Dropbox, SharePoint
- Design: Canva (Proficient), Figma
- Collaboration: GitHub, Azure DevOps, CI/CD

Soft Skills:

Teamwork | Communication | Troubleshooting | Creative Problem Solving | Time Management | Documentation | Training & Support

ADDITIONAL PROJECTS

TechXtraSol (Founder & Developer)

- Created TechXtraSol, a business website that provides IT solutions, developer resources, and tutorials.
- Built secure and scalable web features to include a resources hub, blog, and contact portal.
- Developed automation workflows using Google APIs and AI agents for managing content and sending email notifications.
- Carried out hosting, deployment, and website performance optimization.
- Designed branded assets including visuals and infographics using Canva Pro to boost user engagement.

WORK EXPERIENCE

Laravel Intern

Favitech Solutions Limited — September 1st 2025 – Present | Nairobi, Kenya

- Build RESTful APIs and integrate them with Vue components.
- Maintain existing systems, including bug fixes, refactoring, and feature enhancements.
- Develop new modules and contribute to ongoing product improvements.
- Designed and built an internal file management system used by the company.

Techxtrasol – Founder & Developer
February, 2025 – Present | Nairobi, Kenya
 Founded and manage Techxtrasol, an IT solutions and content platform.

- Design, develop, and deploy secure web applications using Python, C#, and modern frameworks.
- Implement secure coding practices, system hardening, and routine vulnerability checks to ensure data protection.
- Manage cloud hosting, server configurations, and database security.
- Publish technical articles and tutorials to engage and grow a developer community.

Intern

Media Council of Kenya **March 13th 2024 – June 18th 2024**

- Conducted media monitoring and analysis of content broadcasted by radio and TV stations across Kenya.
- Fact-checked various media formats using OSINT tools, such as search by image and exif2.
- Analyzed TV and radio content to ensure alignment with the code of conduct for journalists.
- Wrote weekly report on the entire monitoring and analysis including on instances where journalists and media practitioners violated the code of conduct.
- Contributed ideas to simplify media monitoring and analysis processes.

C# Full-stack Developer

TheJitu

July 2023 – Oct 2023

- Developed a microservice project using ASP.NET Web API.
- Implemented features for hospital management, demonstrating proficiency in backend development.
- Built an e-commerce platform using ASP.NET Core and Blazor WebAssembly.
- Collaborated effectively on GitHub, demonstrating proficiency in version control with Git.
- Utilized Azure DevOps for project management, organizing work using tickets.
- Implemented Continuous Integration and Continuous Deployment (CI/CD) pipelines on Azure for automated deployment.
- Connected application services with Azure Message Bus, showcasing expertise in cloud-based services.

EDUCATION BACKGROUND

- Karatina University **August 2019 – May 2023**
Bachelor of Sciences Information Technology,

SHORT COURSES

- C# Full-Stack Web Development **May 31 2023 – August 24th 2023**
- Huawei HCIA Network truck **March 2022 – May 2022**

ACHIEVEMENTS

- Reached national level in Huawei Networking Competition.
- Built and deployed multiple real-world web projects.
- Created educational tech content and AI integrations on personal blog.
